Day 50 - 90 days of Analytics : Formatting in Power BI

In today's video, we looked at formatting is Power BI

The following were mentioned

-In the Visualisation pane, we have the **Format your visual** Menu.

-The Format your visual has to submenus: **Visual** and **General**

-The visual submenu holds the following options: X-axis, Y-axis, Gridlines, Zoom slider, Data labels, Columns, Plot area background, Legend, Small multiples, …

-The General submenu holds the following options: Properties, Title, Effects, Header Icons, Tooltips. Alt text, …

-We can also search for the option we need in the search bar.

-To apply formatting, we chose an option and adjust according to our preferences.
